Subject: Coachella Valley 2008 ozone plan: 2023 vs 2026

Hi –

On yesterday's monthly tri-agency ozone call, I mentioned that I am now working on a notice of proposed rulemaking for the Coachella Valley plan for the 2008 ozone NAAQS. I also mentioned that in 2016 AQMP there is a statement about Coachella Valley attaining the 2008 ozone NAAQS in 2023. See "Conclusions" on page 7-40. Yesterday I shared with my EPA colleagues Carol Bohnenkamp and Jesse Lueders the "Coachella Valley Weight of Evidence" (Appendix C of CARB's Staff Report for the 2016 AQMP). They both informed me that the Coachella Valley WOE adequately clarifies that 2026 is the intended attainment year for the 2008 ozone NAAQS, and we consider the issue resolved. No need for further clarification in a letter or email from CARB.

Thanks.
